

RGPC Pole Pig

Isolation Power Delivery
Home Theater in a box (<700 W)
Front End of Audiophile system
Flat panel displays

Isolation Power Delivery Model

An isolation transformer separates components from other devices connected in the home that commonly cause ground loops. The Pole Pig is RGPC's 700 Watt isolation transformer which is perfect for isolating the front end of a system. It can also power an entire receiver-based home theater system. With six commercial grade Hubbell outlets, the Pole Pig is available in black or silver and features our award winning Art Deco design with switchable backlit logo (blue, orange or off).

For best performance, it is recommended to couple the Pole Pig with a 400, 600 or 1200 to achieve IsoGray performance - isolation plus parallel power-on-demand.

- 700 Watt isolation transformer
- Ground loop removal
- Total isolation
- Rack mountable with optional shelf kit

Specs:

| | |
|---|---|
| Dimensions: | 8.75 x 5.25 (w/o feet, 6.2 w/) x 11 (WHD) |
| Net weight: | 40 lbs |
